No. 178.

Office of the 2d General Assistant
Mysore District

Dated Mysore 30th Sept 1891
6-10-91.

To,

The Deputy Commissioner
Mysore District.

Sir,

I have the honor to acknowledge the receipt of your dockets nos. 1156 and 1388 and their enclosures, two petitions purporting to have been made to the Dewan by Vasudeva and others of Bettadapura in the Hunsur Taluk, and in reply to submit the following report.

2. The complaint consists of the following 4 items viz.

(1st) That the owners of the lands in the bed of the Davarageri tank have blocked the course of water and cultivated this along with their adjoining lands and thus damaged the "Kode" making the tank shallow and dry during the hot weather.

(2ndly) That while the petitioners' elders planted "Goni" trees to mark the lodgement area of the tank, the people have since overleaped the mark and cultivated the bed of the tank with onions, vegetables &c and have made plantain

gardens

gardens thus making the water unhealthy.

(3rdly) That the owners of the lands in the bed of the tank have by planting hedges including their encroachment, blocked the way by which cattle used to go to drink water; and

(4thly) That the Kerebuvadi Jameen the produce of which was being utilised for the up-keep of the tank is no longer available for the purpose, the lessee having sold it to the present cultivator.

3. I inspected the tank in July last, in obedience to the orders of Mr. Ananda Row, passed on a communication which was pending in the 2nd. General Assistant Commissioner's Office when I took charge of it.

4. The records directed my attention to two points namely (a) the alleged encroachment upon the bed of the tank for cultivation and (b) the fouling of the water there of.

5. With reference to point (a) the inspection has shewn that the lands complained of as having been encroached upon are within the boundaries fixed by the Survey

as

as seen in the village map, and no encroachment is apparent beyond those boundaries. The hedges referred to in the petition are in the same line with the trees said to have been planted 30 or 40 years ago. The Complaint under this head was therefore rejected.

This is a very old complaint. The late M/s Abdul Khader, then Deputy Commissioner personally inspected the lands and on passed the following order in 1884.

"I have seen this place. The gardens have been allowed by previous Officials for the last 20 or 25 years and the Survey Department has also left them as gardens. No objection appears to have been raised hitherto and I cannot interfere now."

6. Some of the boundary marks "Chands" having been suffered to fall into disrepair, and some instances of the stones missing came to my notice, Strict orders have been issued to the Amildar in the matter.

7. As regards (b) there are certain gardens close to the water spread of the tank which no doubt must render the water less healthy. These are chiefly plantains

plantain gardens and have been in existence for many years. The owners do not consent to give them up though a few of them holding small plots agree to give them up for a fair compensation. Steps have however been taken by the Amildar by means of tom tom to prevent these gardeners from throwing the garden refuse into the water and rendering it unhealthy.

8. The other points contained in the petition viz about the cattle being obstructed from going to drink water in the tank and the "Karibundi Jameen" are fresh matters now brought to notice, and early opportunity will be taken to make a personal inspection and local enquiry during the ensuing Jamabandi.

9. The petitions are herewith returned.

I have &c

No 202
Enclosure Verna-cular File

2nd Genl Asstt Commissioners Office
Mysore District
Dated Mysore 2nd December 1891

To

The Deputy Commissioner
Mysore District

Sir,

With reference to the last para of my letter No 178 dated 30th September last and your office docket No 1954 dated 21st October, I have the honor to report as follows on the two points therein left undetermined.

The two points of the Complaint of Vasudeviah and others of Bettadapura are as follow:-

(a) Cattle obstructed from going to drink water in the tank owing to garden holders having planted hedges across the Mamool way and blocked it, and

(b) The produce of the Kerebundi inam is not utilized for the up-Keep of the tank

As regards point (a) the amildar reports that the "Mamool" way by which cattle used to go, has not been obstructed by any subsequent encroachment or obstruction and that the "Mamool" way is on the bund of the tank and a "Woni" or lane in the tope of the South which are now open as ever.

About point (b) the "Kerebundi" inam enquiry

inam was lying waste owing to the death of the holders and was therefore given out on Kandayam which was being credited under the head "Bevaris Inam" in the accounts. During the Inam settle-ment this inam was resumed and in the year Vikrama it was assessed, and given out as Govern-ment land. No steps having been taken by the Villagers for these many years to have the inam or "Kerebundi" revived, it is too late to re-open the question at this distance of time. In July last, on the Amildar's report on this same matter the Deputy Commissioner ordered that the inam having been assessed and given out for cultivation to other people previous to the last Inam settle-ment, the question could not be re-opened.

A copy of the endorsement given in the above terms is herein enclosed.
